PORTFOLIO sayedjehad-portfolio.vercel.app

PROFILE

AI System Developer with a Human Resources background who designs, builds and runs production web platforms end to end with an AI-first workflow. At Lumofy I run 5 live systems (sole developer on 4, main developer on the fifth): the company's Founder OS, an AI-powered careers site and ATS, the HR and attendance platform, and a SCORM delivery platform, each owned from requirements through to production.

EXPERIENCE

AI System Developer, Lumofy (HRTech SaaS, B2B) 04/2026 – Present

- Founder OS:** built Lumofy's full operating system, linking every team in one secure app to track performance and enable alignment across the whole company.
- Lumofy Careers** (careers.lumofy.ai): public careers site plus an in-house ATS with pipeline board, CV library and AI CV parsing, classification and evidence-based candidate analysis (7 AI functions); moved it off Lovable onto a self-owned Supabase and Vercel stack.
- Lumofy HR:** the company's HR, attendance and leave platform (installable PWA) with employee, manager and admin portals: geofenced clock-in with daily reminders, leave, correction and excuse requests with two-stage manager-then-HR approval, a leave policy engine, claims and per diem, service requests, surveys, an org chart, KPI tracking, and headcount, turnover and payroll reports.
- Dispatching Tool:** SCORM delivery platform that licenses Lumofy courses into client LMSs (Moodle, Cornerstone, SuccessFactors, Docebo) via sub-100 KB proxy packages, with seat, date and domain licensing and SCORM 1.2/2004 tracking; page loads cut from 3–6 s to under 1 s.
- AI Authoring Tool** (main developer): Gemini, Imagen and text-to-speech course authoring in English and Arabic with offline SCORM export; plus an **n8n course generator** that turns one sheet row into a full course (17 topics, 24 images, 22 narrations in about 24 min).

Talent Acquisition & Onboarding Specialist, Lumofy 02/2026 – 04/2026

- Ran end-to-end recruitment (sourcing, screening, interviewing, offers), built talent pipelines and onboarding programmes using ATS and HRIS tools.
- Automated recruitment and onboarding workflows with prompt engineering and low-code tools, then handed the function over to HR on moving into the developer role.

Human Resources Intern, Lumofy 09/2025 – 02/2026

- Designed KPI frameworks for employee performance, maintained records in JISR HRMS, built a competency-based talent pool and centralised HR documentation in Notion.

Earlier experience 2024 – 2025

- HR Intern and Sales Intern, Vamonos Hygiene Services (2025):** HRMS administration, employee data and compliance (LMRA, SIO, Bahrain Labour Law), recruitment and onboarding; client outreach and follow-ups.
- Sales Intern, Takhlees Mobile Application (2024):** market research and competitive analysis that informed the app's development and marketing strategy.

PERSONAL PROJECT

- Sayed Jehad World** (sayedjehad-portfolio.vercel.app): an ice-themed side-scrolling interactive resume set in Bahrain, with a scroll-driven camera, hand-built physics and an animated SVG character; Next.js, GSAP, Lenis and Vercel, tuned for smooth 60 fps.

EDUCATION

Bachelor of Business Management 2020 – 2025
Minor in Marketing, University of Bahrain

LANGUAGES

English · Arabic

SKILLS

AI: Claude Code, Gemini agents, prompting, n8n, Lovable
Build: TypeScript, React, Next.js, Node, Supabase, Firebase
Ship: Vercel, Netlify, GitHub Actions, automated testing
HR: full-cycle recruitment, ATS & HRIS, onboarding, KPI tracking
